---

Glyphosphate has hurt me. I choose to **have a choice** about the use of this devastating product.

Glyphosate has been shown to be a neurotoxin, endocrine disruptor, mineral chelator, antibiotic, and carcinogen, which also causes liver disease. Because no comprehensive, long-term, independent study has ever been done that shows real life exposure levels for glyphosate, the safe level of glyphosate exposure on a daily basis is currently ZERO.

sincerely  
Meredith Thomas
